ROLLER DOORS

ROLLER DOOR YOUR FUTURE

The general features apply on roller doors are as follows

- Safety** : The door will automatically stop and reverse when obstructed
- Speed** : The door moves 20cm per second
- Guarantee** : 10 years for the panels & 2 years for the motor
- Silence** : Soundless Operation (safe nylon poly belt beading at the edges)
- Appearance** : Powder coated exterior which enhance the elegant
- Ventilation** : Option for ventilation holes on panels.
- Dual Mode** : Remote control (approximately 100ft). In the event of power failure it can be easily operated manually.

Best of all above, we provide desired after sales service and an overall best customer experience.

Strength & Durability	Smooth, Quiet Operations (Nylon strip)	Safety (Reversible when obstructed)

NEUSTONE™ SURFACING PRODUCTS

ENHANCE YOUR PANTRY WITH NEUSTONE TOP

NeuStone™ is renowned for its cost-effectiveness, stable quality and high level of versatility. Astonishingly easy to cut, route, edge accent and inlay, this luxuriously tactile, hardwearing finish is as at home in heavy-duty commercial applications such as airports, hotels banks and public utilities as it is on kitchen countertops. Available in a choice of almost 230 trendy colors, there really is no easier or more eloquent, functional or affordable way to bring your design ideas to glorious life than NeuStone™.

Seamless and non-porous, NeuStone™ surfacing products are not only incredibly easy on the eye, but also offer end-users the following core advantages:

- High-level protection against bacteria, germs & mildew
- 100% non-toxic and radiation-free
- Strong resistance against stains and chemicals
- Flame retardant and high level of impact resistance
- Easy to clean and care for
- Simple to maintain and replace
- Warm to the touch
- Almost limitless choice of colors, isual textures and creative possibilities.

PROLAVE product has been rigorously tested to satisfy or exceed the most stringent national and international environmental, ethical, quality, safety and health standards

COLOURBOND ROOFING SHEETS & TILES

ONE STOP QUALITY ROOFING SOLUTION

Any Home Improvement is a complex combination of elements, the success of which depends on the quality of materials. Roofing sheet and Cladding sheet are manufactured out of Colourbond steel available in a range of attractive colours, it is durable, strong and thermally efficient.

We use world's finest materials from bluescope Australia.

- A choice of colour range to suit any sort of modern home style.
- Superior oven baked finish resisting chipping, peeling and cracking
- Advanced Super Polyester pre-painted coating technology, which ensures your roof will stay looking newer for long.
- Design Flexibility - Provides more scope for interesting shapes, and delivers a lightweight roofing solution that gives you the freedom to design a floor plan that better suits your lifestyle.

Roofing Sheet Profile	Cladding Sheet Profile
 Feeding Width : 914mm Effective : 762mm Thickness : 0.40 mm, 0.47 mm Range : Non colour, Zinc Alum, Colour-bond Tensile Strength: 550N/m Coating Mass : Az 150 (g/m²)	 Feeding Width : 914mm Effective : 710mm Thickness : 0.35 mm, 0.40 mm, 0.47mm Range : Non colour, Zinc Alum, Colour-bond Tensile Strength: 550N/m Coating Mass : Az 150 (g/m²)

ELWOOD (Plastic Composite Timber)

ENHANCE YOUR OUTDOOR LIFESTYLE WITH ELWOOD DECKING.

Our Wood Plastic Composite is made from recycled wood/bamboo fiber, plastic and chemical additives which look and feels like natural timber. Unlike timber however, as a manufactured product, each board is perfectly consistent with no natural imperfections such as knots. Further our product will not crack, rot and warp. Without the need to spend your weekend maintaining your deck, you will have more quality time for friends, family and recreational activities.

They do not need to be paint or stain as they already come in which a range of colors and will remain for years to come. Due to its main feature such as high degree of UV stability, high resistance to extreme weather conditions (40C to 60C) high resistant to moisture and termites.
